

BioLynceus provides biological solutions for wastewater. Our cost effective solutions provide micro-biology that rebalance water environments.

The data below shows a three month reduction of sludge in an industrial wastewater lagoon system. The measurements were taken from a client who had been using the BioLynceus.

This sampling demonstrates how an existing program can perform over a three month time span where measurements were conducted by sludge judging. Typical programs include an initial inoculation and a continuous feeding of the products into the system. Actual results may vary.

Sludge Judging Data 03-07 to 06-07

Lagoon #1	NE	Mid	SE	Center	NW	Mid	SW
3/16/2007	12"	18"	30"	18"	42"	18"	24"
6/12/2007	18"	12"	6"	18"	24"	18"	12"
Average Reduction: 7.71"							
Lagoon #2	NE	Mid	SE	Center	NW	Mid	SW
3/16/2007	0"	42"	42"	42"	30"	42"	48"
6/12/2007	18"	6"	0"	12"	0"	18"	18"
Average Reduction: 25.7"							
Lagoon #3	NE	Mid	SE	Center	NW	Mid	SW
3/16/2007	0"	6"	6"	12"	36"	18"	0"
6/12/2007	0"	6"	0"	6"	18"	0"	0"
Average Reduction: 6.85"
